Frank J. Giunta is Senior Vice President and Managing Director in charge of Hill's Construction Claims operations throughout the U.S. and Canada. He has more than 30 years of extensive experience in engineering and construction consulting. He has been actively involved in the evaluation, presentation, resolution and management of construction claims, as well as project management oversight. Mr. Giunta has managed complex consulting assignments on behalf of public and private owners, engineers, contractors, insurance and financial institutions. These assignments have involved a wide range of projects which include highways and bridges, dams, power related facilities, water and wastewater treatment, landfills and building construction. He has been engaged in the design of civil structures, including roads, highways, railroads, hydraulic structures, underground piping systems and has prepared engineer's estimates and technical specifications.

Mr. Giunta is a Professional Engineer with memberships in New Jersey and Pennsylvania. Mr. Giunta earned a B.S., Cum Laude, in Civil Engineering from Temple University and an M.B.A from Drexel University.

ABOUT HILL INTERNATIONAL

For more than three decades, public- and private-sector clients worldwide have selected Hill International (Nasdaq:HINT) as construction consultants on their most complex projects. Each client has unique needs and goals, yet they all choose Hill because they need experts who can prevent problems, minimize risks and eliminate surprises—they need a firm they can trust who will deliver results. Meeting our clients' diverse needs in handling construction risk and exceeding their highest expectations is our goal at Hill. We accomplish this objective through a broad range of project management and construction claims services that support our clients during every phase of a project, from planning and design, to procurement and construction, to start-up and operation. With more than 1,500 employees in 70 offices in 25 countries around the world, Hill has the experience and the expertise to help our clients deliver their projects on time, within budget, and with the highest quality possible.

PROJECT MANAGEMENT SERVICES

Construction is one of the world's most difficult and challenging endeavors, and big projects carry big risks. Even one mistake in any of the thousands of different tasks on a project can mean big problems and result in serious schedule delays and cost overruns. With the financial stakes so high, it is critical that every step of the project be managed carefully. Hill International is one the premier firms in the world helping our clients manage their projects more effectively. Whether the project is a high-speed rail line or a high-rise office building, we can provide to our clients a full spectrum of services, including program management, project management, construction management, project management oversight, troubled project turnaround, staff augmentation, project labor agreement (PLA) consulting, and estimating and cost management services.

CONSTRUCTION CLAIMS CONSULTING

Even the most carefully planned construction project can encounter problems, including claims and other disputes. How those claims are handled, however, can be the difference between success and failure for the project. Since our founding in 1976, Hill International has been a world leader in providing construction claims services to our clients, including owners, contractors, subcontractors, architects, engineers, law firms, insurance and surety companies, and commercial and investment banks, on some of the largest and most complex projects in the world. Hill's approach to claims resolution is broad-based and relies on the participation of Hill's multi-disciplined staff of engineers, architects, project and construction managers, cost and damages experts, scheduling and delay experts, legal specialists, contract administrators, accountants and other specialists. Such a range of expertise is essential in analyzing the complex liability, causation and damage components of a claim. Hill's claims experts conduct detailed analyses of the claims, break them down event by event and issue by issue, to help facilitate evaluation and resolution. Hill's array of services includes claims analysis, litigation support, cost and damages assessment, delay and disruption analysis, expert witness testimony, lender advisory services, risk management, adjudication and the Project Neutral[®]. The following is a list of our Project Management and Construction Claims services.
