

Medilex has experts in more than **160 distinct medical specialties** to handle **medical malpractice** cases, **wrongful death suits**, **pain and suffering** evaluations, **cause and manner of death/injury** determinations, **toxic exposure** assessments, **forensic psychiatric** determinations, complex causation analyses, independent **autopsies**, **criminal** complaints (e.g., child abuse, assault), and lead exposure cases (particularly developmental/metabolic damage).

Medilex has been providing high-quality, cost-effective medical and related-field expertise to plaintiff and defense counsel since its founding, in 1992, by an internist/geriatrician, a cardiologist, and an attorney. **Medilex** experts can review materials, consult with attorneys, prepare written reports, and provide expert testimony. Most experts are current or former department chiefs and/or medical school faculty and range from well-published academicians to private practitioners.

But **Medilex** is more than medical experts:

- ◆ **Free Initial Telephone Triage:** We begin with **free telephone Triage** – an in-depth case analysis with our Director who has consulted with experts and attorneys on more than **10,000 complex medical-legal cases**. He will help you: make the medicine more understandable, assess case merits/defenses, frame medical arguments, identify the specialty field(s) implicated, form methodical strategy, determine the requisite materials for review and detect dispositive issues.
- ◆ **Cost Control That Rests With The Attorney:** *Medilex guarantees that the cost of the initial review and verbal report will not exceed our minimum fee unless you agree in advance.* If the expert cannot review your case and provide a verbal report for the minimum fee, you will be told in advance of the exact balance and given the option of cancelling the review and receiving a substantial refund. While review times may exceed the minimum fee, the ultimate control over the fee is with the attorney.
- ◆ **Methodical Case Supervision Throughout:** **Medilex** guarantees methodical case supervision – a knowledgeable, accessible, medical-legally experienced liaison/resource throughout the entire process.
- ◆ **Broad Expert Field Coverage:** **Medilex** has experts in more than 160 distinct medical specialties:
