Firm/Expert Profile:

Since 1982, Expert Medical Witnesses has been providing attorneys throughout the United States with physicians and dentists possessing superior credentials who are willing to objectively review medical records and testify as to the quality of care rendered, and issues of causation in medical malpractice cases.

Our independent doctors provide comprehensive medical reports or affidavits of merit, sufficient to be utilized in settlement negotiations, discovery and pretrial statements. If testimony is necessary, we give a money back guarantee that the same physician who signed the report will be available to testify upon reasonable notice.

We are proud to provide you with physicians whose credentials bring credibility to your case, not "hired guns". We offer board certified physicians, many of whom are on the faculties of our country's most prestigious medical schools, as well as active clinicians.

Reasonable one time fee for evaluation and comprehensive signed report. Fees for consultations, depositions and trial testimony quoted in advance and commensurate with the credentials of our nationwide experts.

"Credentials Deliver Credibility"
