Performance & Experience

For over 30 years, Hagen, Steiff, Newton & Oshiro, Accountants, PC has provided a wide range of forensic accounting and litigation services – from expert witness testimony and analysis of relevant economic issues, to evidence gathering and administrative support – with one objective in mind: presenting the strongest and most persuasive case possible based on the facts and evidence. We are strong advocates for our opinions.

Our team of professionals has the ability to provide an immediate response to strengthen your case. Since we have no recurring audit or tax clients, HSNO is able to provide rapid response to any legal proceeding. In addition, our firm structure enables us to perform quality work without causing undue economic costs to your clients, whether your case is a simple dispute or a multi-party litigation.

Qualifications

When you select an expert to testify, you need a witness with the proper credentials and experience – someone who is confident, credible, persuasive and able to rise above the pressures of cross-examination. Moreover, your expert must identify with the jury, employing basic and compelling communication skills to simply explain complex ideas. The professionals at HSNO understand the intensive work involved preparing testimony and the crucial role expert witnesses play in a case.

Our extensive background as accomplished expert witnesses and litigation consultants provides you with persuasive and thorough testimony and analysis – supported by facts applied to a sound theoretical basis – and comprehensive support and implementation of a well-conceived and executed strategy.
