**Avomeen Analytical Services**

4840 Venture Drive, Ann Arbor, MI 48108  
(800) 930-5450 (office) (800) 930-5479 (fax)  
[www.avomeen.com](http://www.avomeen.com)

**Lead Expert Witness**

Shri Thanedar, Ph.D., MBA  
CEO/Chief Chemist  
[sthanedar@avomeen.com](mailto:sthanedar@avomeen.com)

---

**AREAS OF EXPERTISE**

- Patent Infringement
- Trade Secrets
- Product Liability
- Personal Injury
- Criminal Defense

**CUSTOM ANALYTICAL TESTING METHODS**

- ID of unknown chemicals/contaminants
- Failure analysis of paints, inks, plastics, adhesives, sealants, and metals
- Reverse engineering of complex formulations for patent infringement cases

---

**CHEMISTRY LITIGATION SUPPORT**

Avomeen Analytical Services offers a full range of chemical analysis and litigation support services, from specialized testing and consulting during trial preparation to providing Ph.D. chemist expert witnesses with strong credentials, testing expertise, and experience communicating in a litigation setting.

---

**EXPERT WITNESS TESTIMONY**

Avomeen expert witnesses have decades of experience and have been carefully vetted and selected for their ability to provide accurate results and testing reports. They are skilled in successfully defending their findings in cross-examinations, depositions, and trial settings.

Avomeen's Ph.D. scientists have solved tough problems for clients in the fields of chemistry, biology, engineering, toxicology, and materials sciences.

---

**LABORATORY FACILITIES**

All testing is performed in Avomeen's secure and confidential state-of-the-art chemistry laboratories. Avomeen chemists provide testing reports with data, interpretations, and conclusions that both scientists and non-scientists can use and understand.

Our independent laboratory specializes in the deformation, or reverse engineering, of complex chemical mixtures – a powerful tool for solving patent disputes, identifying contaminants, or isolating the source of product failures. Avomeen's deformation experts can identify and quantify a full list of the active and inactive ingredients in a complex formulation, and can isolate components present at the parts-per-million (PPM) or parts-per-billion (PPB) levels.

---

*Let Avomeen manage all of your chemical analysis and litigation support needs, from the laboratory to the courtroom. Please call 1-800-930-5450 or visit [www.avomeen.com/litigation](http://www.avomeen.com/litigation) for more information.*
