Atlantic Environmental, Inc. is a small business concern that was founded in 1978 for the purpose of providing consulting and testing services in industrial hygiene, safety, and environmental fields. The founder and CEO of Atlantic Environmental, Mr. Robert E. Sheriff, CIH, CSP, brought with him extensive experience from industry and the commercial casualty insurance market. Prior to 1978, Mr. Sheriff was the Corporate Safety, Health, and Environmental Manager of Sun Chemical Corporation. Prior to that, he was an Industrial Hygienist and Loss Control Representative for Continental Insurance. His education includes a Master of Science degree in Preventative Medicine and Environmental Health with a Major in Industrial Hygiene, and a Bachelor's Degree in Zoology. Mr. Sheriff is also a Past President of the American Industrial Hygiene Association (AIHA).

Dr. Frederick Toca, Ph.D., CIH, CSP has more than 30 years of experience as a Corporate Manager, Director and leader of Occupational Health, Industrial Hygiene, Safety and Environmental Programs. Prior to accepting this position, Dr. Toca was the Director of Occupational Health for Hoechst Celanese Corporation. He has also previously managed programs for USX Corporation, General Electric, and Tenneco. Dr. Toca is also a Past President of the American Industrial Hygiene Association (AIHA).

The headquarters of Atlantic Environmental, Inc. is located in Dover, NJ (New York City Metro Area) and has offices also located in Atlanta, Boston, Chicago, Dallas and an affiliate in Los Angeles.

The principal members of Atlantic Environmental, Inc. have extensive experience in all types of activities within the industrial hygiene, safety and environmental profession and associated fields. Their professional experience started long before the inception of Atlantic Environmental in 1978. The principals have all the experience required to understand the specific requirements related to OSHA regulations, EPA regulations, NIOSH criteria documents, ACGIH publications, as well as universally accepted protocols established in the private and public sector for providing risk assessments, base line surveys, detailed monitoring surveys, project management, organizational development and liability issues.

As a small business that provides the overwhelming majority of its services to large organizations and government agencies, the company's viability depends on our quality of work, the qualifications of our principals and staff, the strength of organizational management and the ability to rapidly deliver final formal reports after all laboratory data and information has been evaluated.
