

THE FIRM

The Sobel Tinari Economics Group (STEG) is a team of award-winning economists, and analysts, who provide economic consulting services in litigated matters. Our forensic experts specialize in writing individualized economic loss appraisals for solo attorneys, large law firms, and government agencies. We have authored thousands of reports and our experts have collectively testified in numerous trials, hearings and depositions in NY, NJ, PA, CT, MA, FL, LA, GA, VA, TX, CO and other venues.

We are a cost-effective and exceptionally responsive alternative to larger consulting firms. The goal of STEG is to meet the needs of law firms, large or small, at reasonable rates. Because of the cutting-edge knowledge and broad experience of our testifying experts, STEG has excellent command of the many substantive issues that may arise in the course of an engagement. And with our staff of full-time research analysts, we are able to quickly respond to changing needs and circumstances. STEG further distinguishes itself by attempting to adhere to the highest ethical standards. We strive to practice civility and professionalism in all circumstances – to attorneys, their clients, and the Court.
