# THE EXPERT TEAM

## David T. Fractor, Ph.D.

With about 30 years experience consulting in labor-related issues, Dr. Fractor has testified in over 700 depositions and 300 trials and arbitrations. His practice focuses on individual claims and losses relating to earnings and benefits, household services, future medical needs, and other applied economic valuation. His practice also includes employment matters and personal injury/wrongful death assignment including medical malpractice cases, toxic torts, and asbestos related litigation.

## G. Michael Phillips, Ph.D.

With more than 35 years' experience consulting in the areas of econometrics, statistical analysis, and financial modeling, Dr. Phillips specializes in data-intensive research and complex litigation, statistical analysis, and financial and economic modeling. He also provides strategic oversight for many of the firm's statistics, class action, commercial, financial, and valuation engagements. He directs our custom research and complex litigation services.

## Edward T. Garcia, M.S.

is an economist and business valuation analyst with over a decade of experience consulting in loss of earnings, earning capacity, and household service losses for single plaintiff and class action engagements. His practice areas also include business valuation, commercial loss, and finance related matters.

## Robert Neff, CPA, ABV

is the Director of Forensic Accounting for PFC. His practice covers forensic accounting, business valuation, net worth and financial statement analysis and lost profit issues. He has experience analyzing breach of contract, misappropriation of trade secrets, financial fraud and other complex financial and accounting issues.

**William W. Roberts, Ph.D.** is an economist and statistician for PFC specializing in class action labor market cases. He analyzes wage and time statements, designs and analyzes questionnaires, and performs other statistical and economic analysis as needed to assess complex labor and PAGA claims. He also provides general economic consulting including regional economic impact analysis.

**Dennis Halcoussis, Ph.D.** applies econometrics and other statistical theory to estimate losses in civil cases including complex litigation. Author of a major college textbook in econometrics, his practice includes applied economics, labor market analysis, modeling in complex litigation and data-interview matters.

**A. Lynn Matthews, Ph.D.** specializes in market research; survey research and methodology; quantitative, qualitative, and mixed methods research.

**Craig Kerr, Ph.D.** provides consulting services in a variety of areas including industrial organization, labor markets, professional sports, and data analytics. Craig is a recent addition to the PFC expert team.

**William Ingersoll, Ph.D.** is an expert in network economies, industrial organization, applied economics, and quantitative methods. Will is a recent addition to our complex litigation team.

**H. Drew Fontaine, CPA, Ed.D.** is a forensic accountant with extensive industry and teaching experience. His practice includes financial statement analysis, net worth analysis, and forensic accounting projects.

**George Arzumanyan, CFA, CIMA<sup>®</sup>** provides litigation support services in areas of statistics, finance, and economics including sampling, Monte Carlo, and financial engineering applications. He also brings investment and portfolio management expertise.

**Laurel Fish** provides expert witness services and workflow management in cases involving economics, statistics, and data analytics. She has graduate training in applied economics and econometrics and has published research regarding Monte Carlo methods.

**Timothy Sargent** manages our databases and specializes in data warehouse construction and management. He brings advanced proficiency in Excel, SQL, Python, and other data handling tools.

**Sean Chasworth** is a consultant supporting wage-hour and other employment litigation. He provides spreadsheet construction and database assembly and programming services.

**Jeannie Wong** has been our Case Coordinator for over 20 years and is our first contact for your administrative and scheduling requests. If you do not know which expert fits your case needs, Jeannie can help you select the appropriate expert.
