

DR. ERIC B. COLE
Cyber Security and Technology Patents
Expert Witness

20442 Northpark Dr, Ashburn, VA 20147
703-675-2055 ecole@secure-anchor.com @drericcole

Dr. Cole is a computer and network security expert with 30 years of experience in the industry. After earning his master's degree from NYIT and doctorate from Pace University, his career began with the CIA and has included roles such as CTO at McAfee and Chief Scientist for Lockheed Martin. In addition to his current position as Founder and Chief Scientist of Secure Anchor and his duties as SANS faculty fellow and course author, Dr. Cole serves as an expert for both plaintiff and defense. His expertise has been called upon for cases involving

- Patent Infringement, Invalidity, and Damages
- Security Due Diligence
- False Claims and Filings / Security Validation

A published author of seven books on cyber security, Dr. Cole is heavily involved in cyber security research and development and is an invited speaker for, and a member of, many key organizations, including the Commission on Cyber Security for the 44th President, Barack Obama, and the Purdue University Executive Advisory Board. He has a knack for taking complex technical information and making it digestible and understandable to business audiences as well as triers of facts such as juries and judges.

Areas of Expertise include:

- Computer & Network Security
- Security Breaches
- Network Intrusions
- Advanced Threats
- Distributed Networks
- Encryption Techniques, Algorithms, and Implementation
- Cryptography
- Secure Socket Layer, Authentication, and Smart Cards
- Source Code Review
- Information Assurance / Information Protection
- Cyber Crime / Cyber Security
- Intellectual Property Analysis
