Curriculum Vitae

Trust is vital to a successful polygraph exam.

You must trust the polygraph examiner completely and have absolute faith in his knowledge, training, ability and professionalism. Dr. Rovner's background, accomplishments and credentials are worthy of your trust.

Dr. Rovner is among the most qualified and respected experts in his field. He has conducted scientific research in lie detection and is widely published. Dr. Rovner has also taught Psychology and Statistics as a university professor, and has been teaching polygraph examiners since 1985. In addition, he is recognized by the judicial system as an expert in polygraph testing, and has testified in court on numerous occasions.

Criminal Cases

Scientific research has shown that a properly administered polygraph test is accurate 96% of the time. This is a far higher accuracy rate than most other forms of evidence, including eyewitness testimony, fingerprint identification, and psychiatric opinion. Your clients should have the opportunity to prove their innocence.

Civil Cases

When a lawsuit boils down to a "he said, she said" situation, a polygraph test provides objective, independent corroboration for your client's side of the story. When large sums of money and reputations are at stake, polygraph can help you to ensure that justice is done.

Divorce Cases and Child Custody Actions

People in the midst of a divorce make malicious and untrue accusations against their spouse, often just to hurt them. If your client has been unfairly accused of anything in a divorce proceeding or custody dispute, a polygraph test can provide strong evidence in his or her behalf.
