Summary:

Past President of the California Academy of Eye Physicians and Surgeons, and Associate Clinical Professor at UC-San Francisco, Yale-educated Dr. Andrew F. Calman provides comprehensive expertise in ophthalmology, emphasizing complex patent and antitrust litigation regarding ophthalmic pharmaceuticals, as well as tort cases for ocular injuries and complications of cataract surgery for both plaintiffs and defendants. Dr. Calman is a board-certified ophthalmologist who helped pioneer modern techniques in cataract surgery, was involved in making state and national guidelines and coverage policies on cataract surgery, and has trained cataract surgeons at two of the nation's finest ophthalmology residency programs. His private practice in comprehensive ophthalmology also includes glaucoma, diabetic retinopathy, retinal vascular disease, and other non-surgical problems of the retina, as well as cornea, external disease and neuro-ophthalmic disorders.

Attorneys who have worked with Dr. Calman whether in small injury cases or complex patent litigation, have praised his outstanding responsiveness, deposition and trial skills. Dr. Calman's detailed and thoroughly researched reports frequently result in prompt settlements. He has served as an Ophthalmology Expert for the Medical Board of California, and developed national eye care policy with the Medicare Carrier Advisory Committee and the American Academy of Ophthalmology. In addition to experience with injury and malpractice cases, he is also familiar with Hatch-Waxman Paragraph IV Disputes, inter partes review, biosimilars, and antitrust issues concerning pharmaceuticals. He has been qualified as an expert in state and federal courts in the United States, as well as the state supreme court (Oberlandesgericht) of Germany, and never disqualified.
