Forensic Psychiatry & Psychology

Forensic Psychiatric Associates, LP (**fpamed**) is a group of psychiatric and psychological experts providing assistance to defense and plaintiff attorneys around the country. Our consultation, reports and testimony aim to illuminate the mental health issues in legal matters. We consult in both civil and criminal matters on both sides of the bar. Our primary skill is explaining complex medical and behavioral information in a readily understood and accurate manner. In the legal arena, as in our clinical practices, our central goal is teaching, scholarship and clear communication.
